MPDU dataset, Nov 10 2026

Main changes since the Oct 29 pipeline

- **One row per project.** 219 report rows → 206 (13 projects listed twice, `project_fixes.csv`) → 186 (phases of one plan summed: 10 plan groups, e.g. Cabin Branch, Clarksburg Village, Park Potomac, North Bethesda Center).
- **Every base read against its Planning Board document.** 351 hand-coded rows appended to `manual_coding.csv` (346 → 697); Audrey's rows unchanged. 2 of 178 bases have no data table online.
- **Each project grouped by the rule it faced** (`08`): bonus available; ceiling at base (33 rezoning or plan caps that include the MPDUs, CR points); height limit; CR lump at 15% (2014 rule); own schedule (Bethesda Overlay, RE-1); other program; unclear.
- **Old or new schedule** from the site plan acceptance date (before or after 31 Oct 2018); Strathmore Square kept at the 12.5% minimum (sketch plan before Bill 38-17).
- **Report units corrected** where the documents disagree (`total_fixes.csv`): Maple Ridge 67 → 59, Reserve at Fair Hill 113 → 133.
- **Flags, nothing dropped:** subsidy, 25% impact-tax share, TDRs, other programs, 15% minimum areas.
- **Open:** caps equal to base × 1.22 (7001 Arlington, Reserve at Fair Hill, Brody, Avalon, Layhill Overlook); rounding the base to whole units (moves 3 positions); calls 3 and 12.

Samples

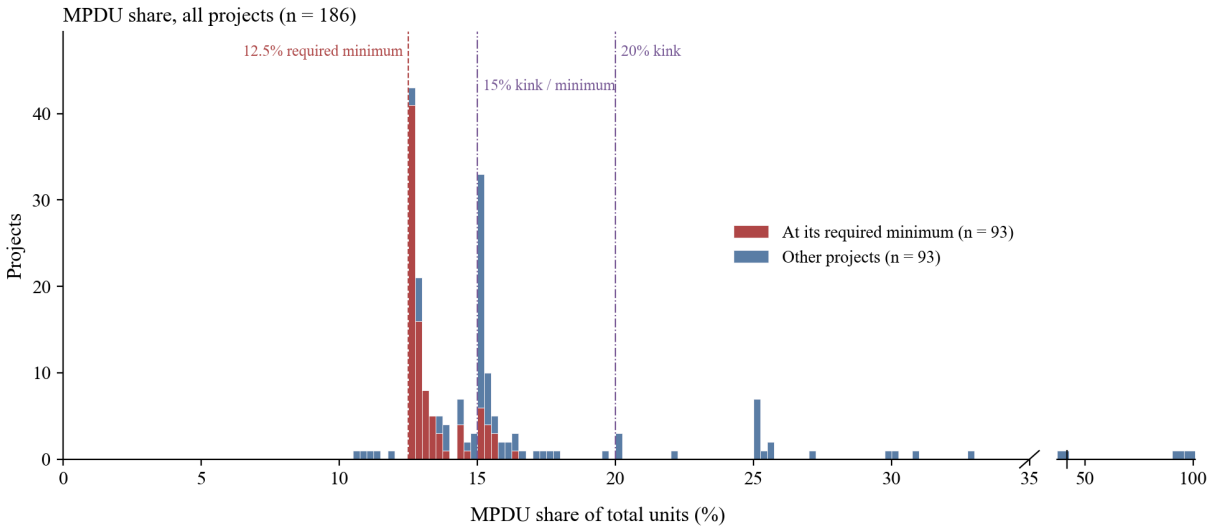

Sample	Projects
Report rows	219
Listed twice counted once	206
All: plan groups counted once	186
Base: with a resolution base	178
Bonus: MPDUs could buy units above base	90
Choice: bonus, no subsidy, no 25% impact-tax share, 12.5% minimum	65
Wedge: faced a known price for density and chose its own share	100

Position against base, by group

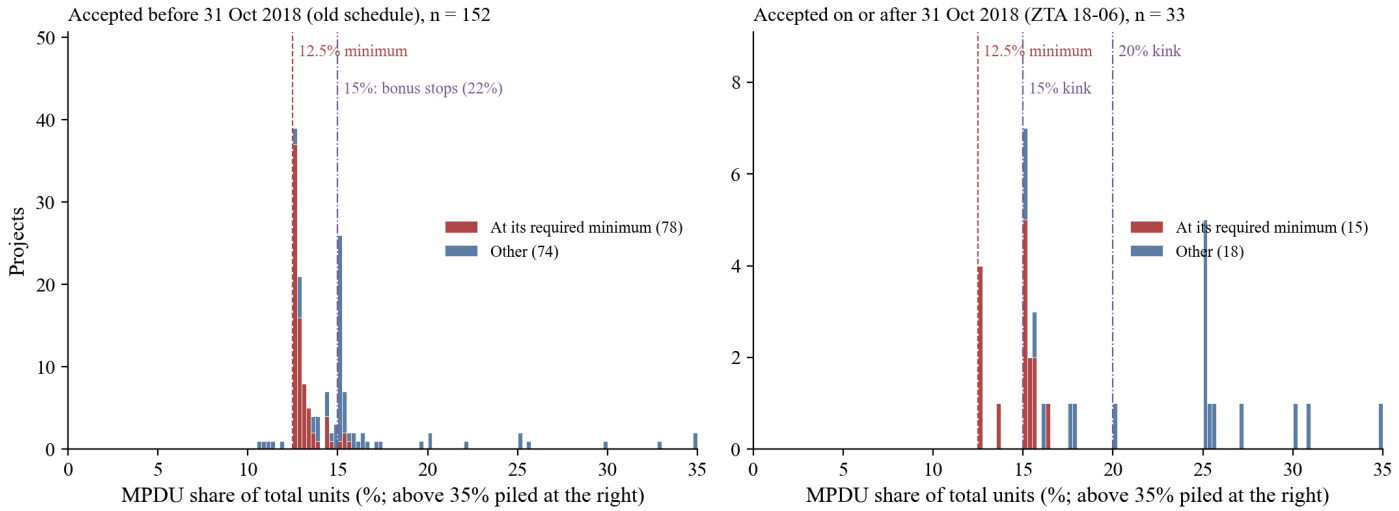

Group	Below base	At base	Between	At 22%	Above 22%	Total
Bonus available	34	7	18	29	2	90
of which choice	*20*	*4*	*13*	*27*	*1*	*65*
Ceiling at base	16	28	0	0	0	44

Wedge sample	*30*	*18*	*17*	*27*	*8*	*100*

Figures

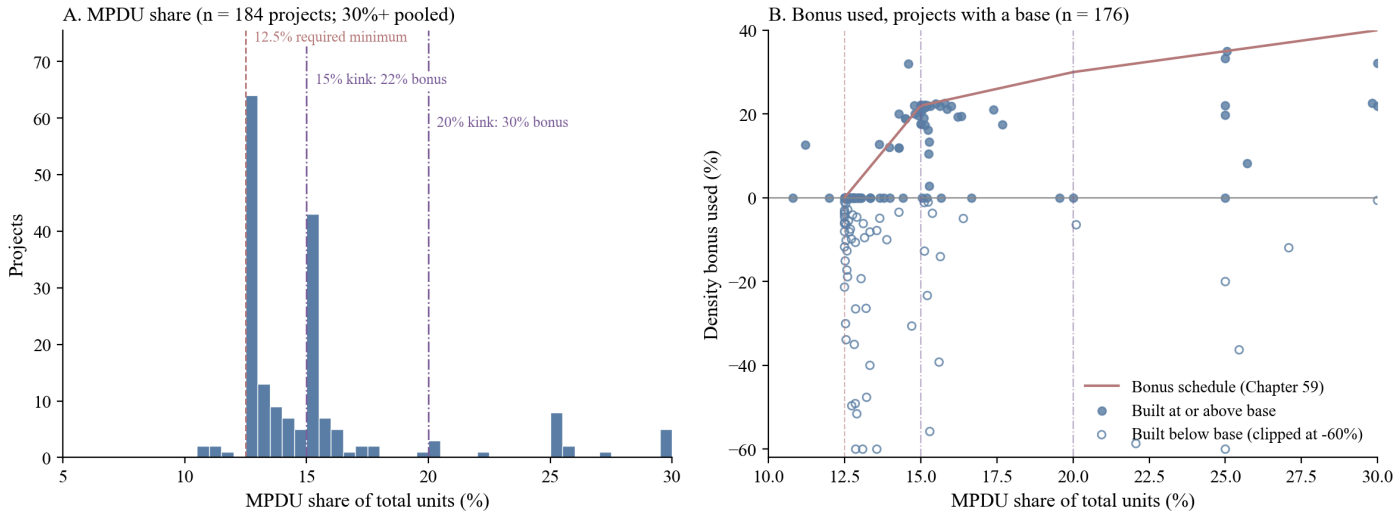

Evan's figures (`02`, `04`, `07`), drawn on the 186 projects instead of the 219 report rows (`11_dataset_figures.py`).

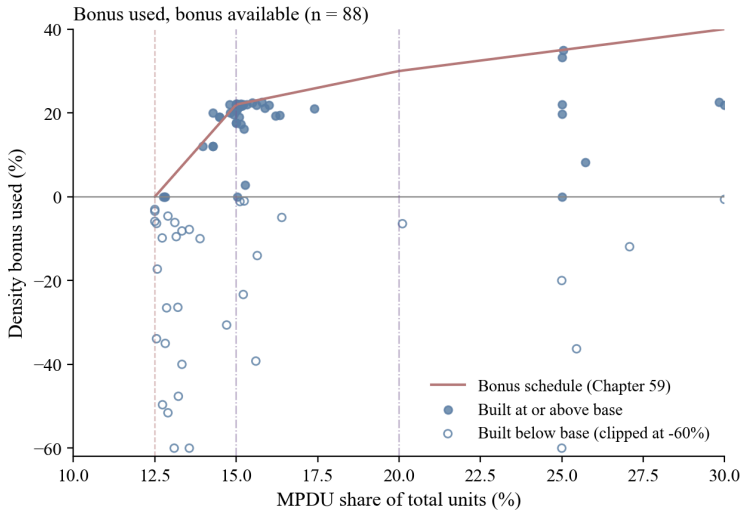

MPDU share, all projects (as `04`).

MPDU share by schedule (as `07`). One project with unknown regime not shown.

MPDU share and bonus used (as `02`). Shares of 50% or more left out, as in `02`.

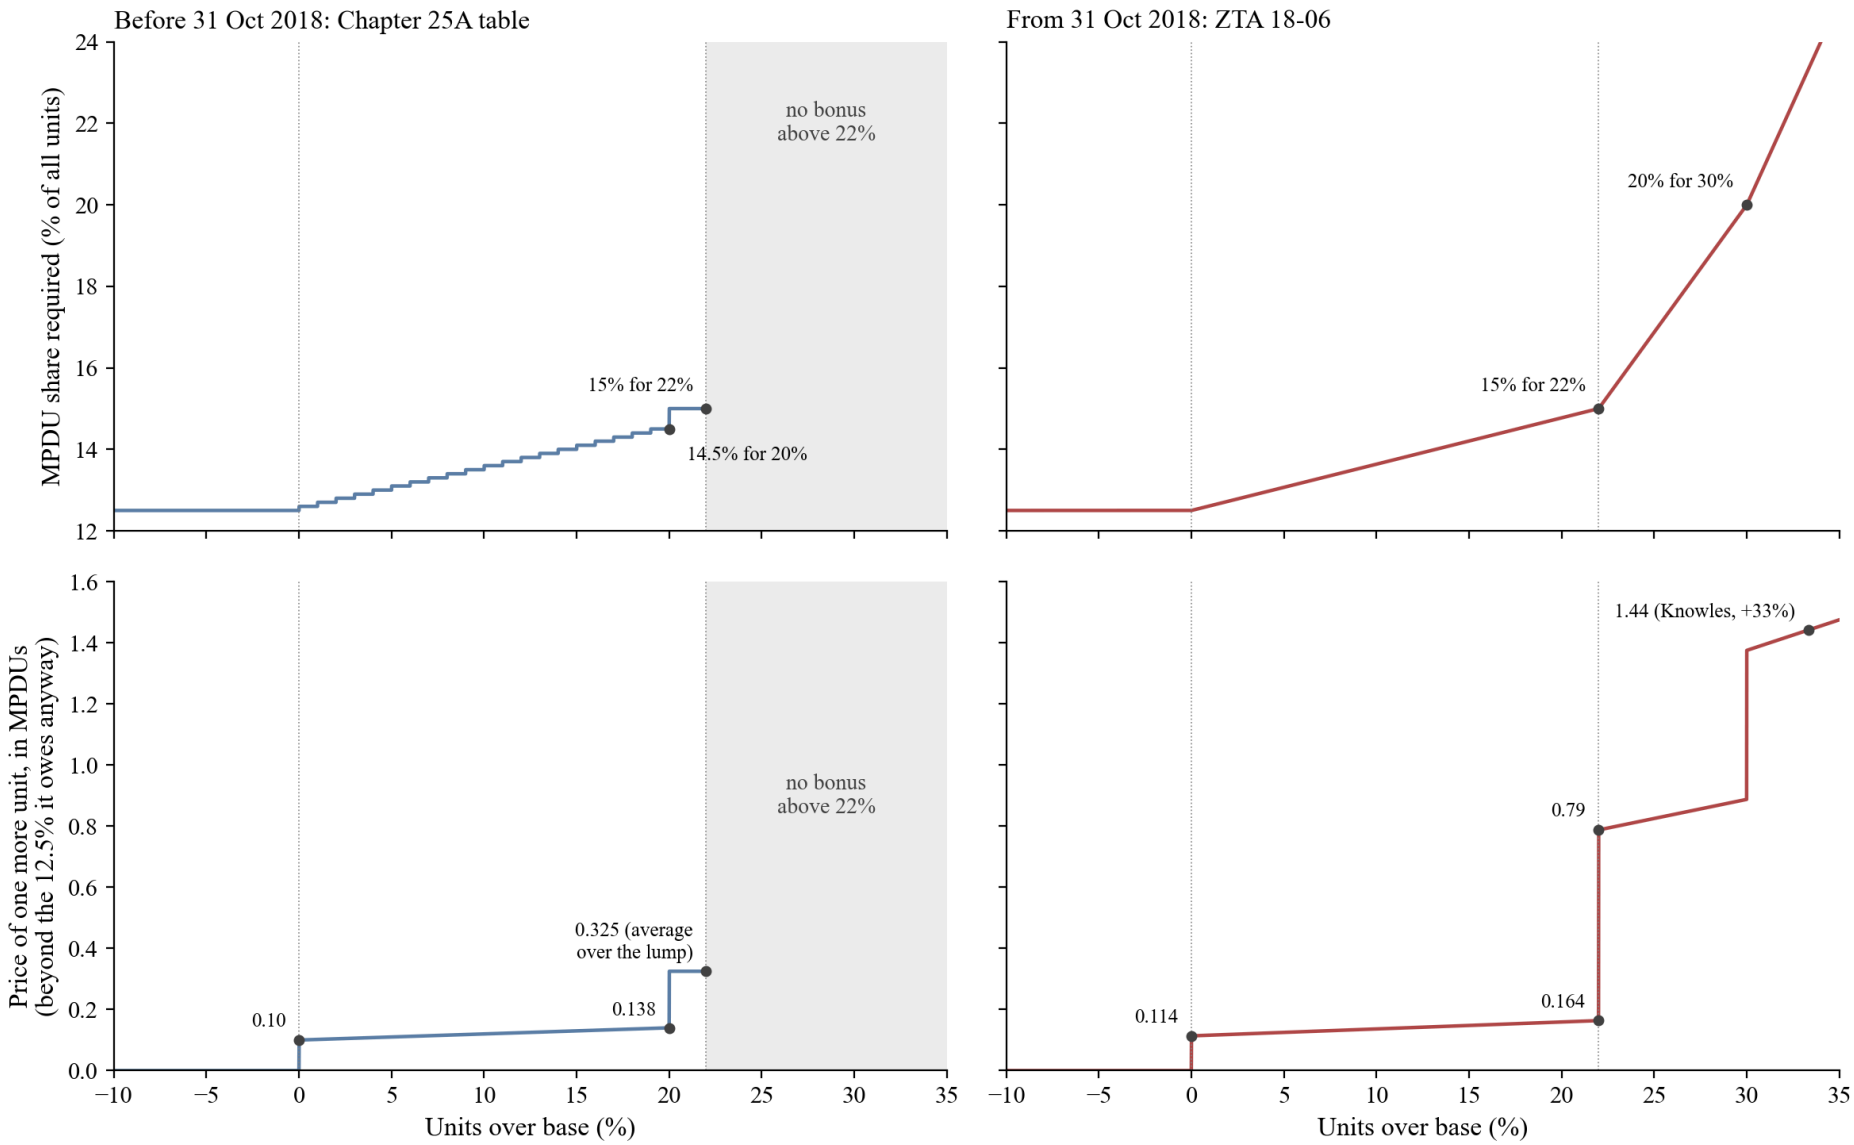

Panel B, bonus-available projects only.

Estimation sample: the wedge sample (100)

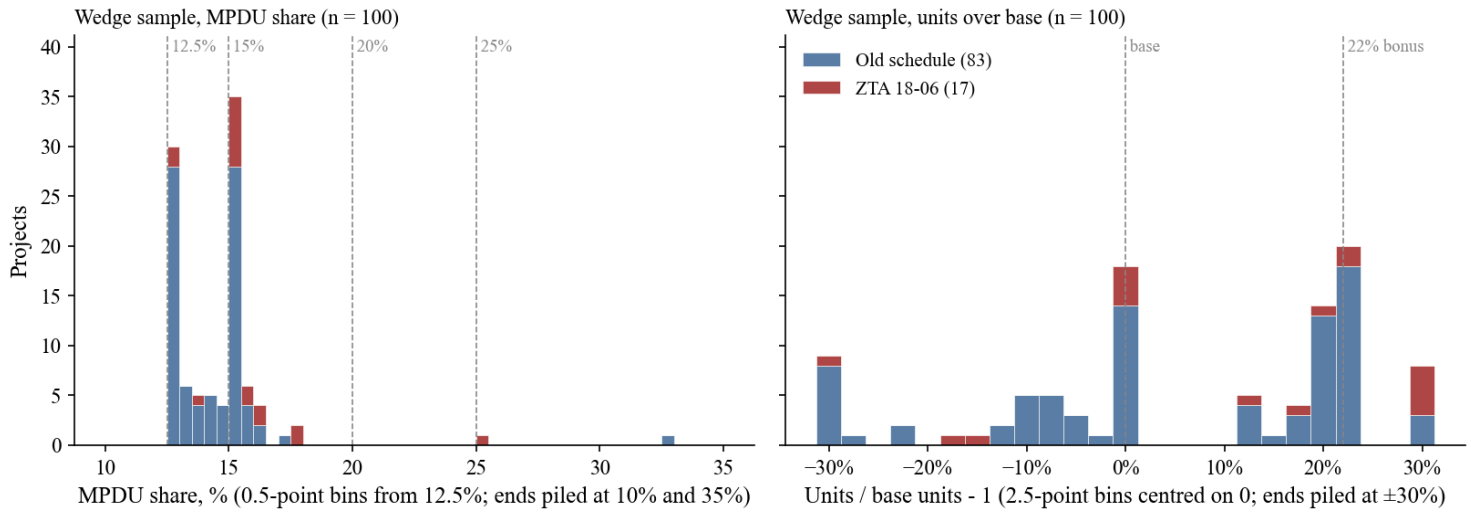

Projects that faced a known price for density and chose their own MPDU share (`08 wedge_sample`): bonus available 70, height limit 12, CR lump at 15% 8, own schedule 10. Each project's position gives a bound on its wedge w, in MPDU discounts d (`10_wedge_bounds.py`).

Position	Bound on w	Projects
Below base, or a 15% minimum below 22%	w = 0	33
At base, old schedule	0 ≤ w ≤ 0.100	4
At base, CR lump at 15%	average w ≤ 1/6	5
At base, height limit	w ≥ 0, no upper bound	7
Between, old schedule (below a 20% bonus)	exact, 0.124-0.138	9
At 20%, old schedule (14.5% MPDUs)	0.140 ≤ w ≤ 0.325 (average over the last step)	2
At 22%, old schedule	average w over the last step ≥ 0.325	25
At 22%, ZTA 18-06	0.164 ≤ w ≤ 0.788	2
Above 22%, ZTA 18-06 (Flats at Knowles Station)	exact, 1.442	1
Inside the old last step (Reserve at Fair Hill: paid for 22%, built less)	none	1
RMX zone (Buckingham Station: each MPDU adds one unit, no market units)	not modeled	1
Own schedule (Bethesda Overlay, RE-1)	not modeled	10
Total		**100**

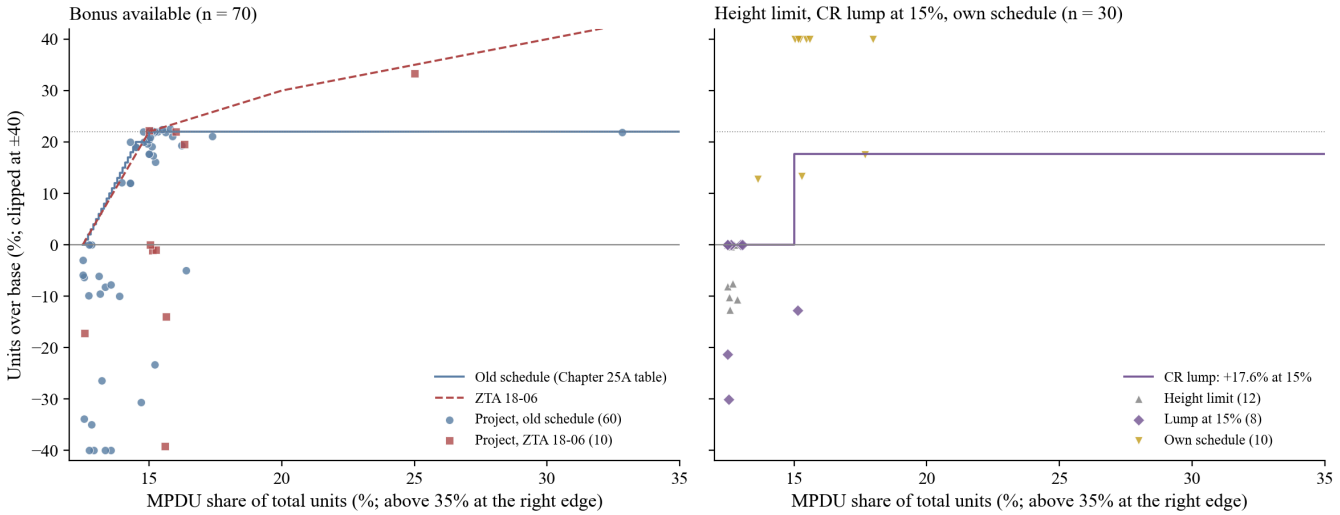

Old schedule: the Chapter 25A table in force until 31 Oct 2018 (Bill 34-17, pp. 19-20): a bonus up to k% needs 12.5% + 0.1k% MPDUs to 20% (14.5%), and any bonus above 20%, up to 22%, needs 15%.

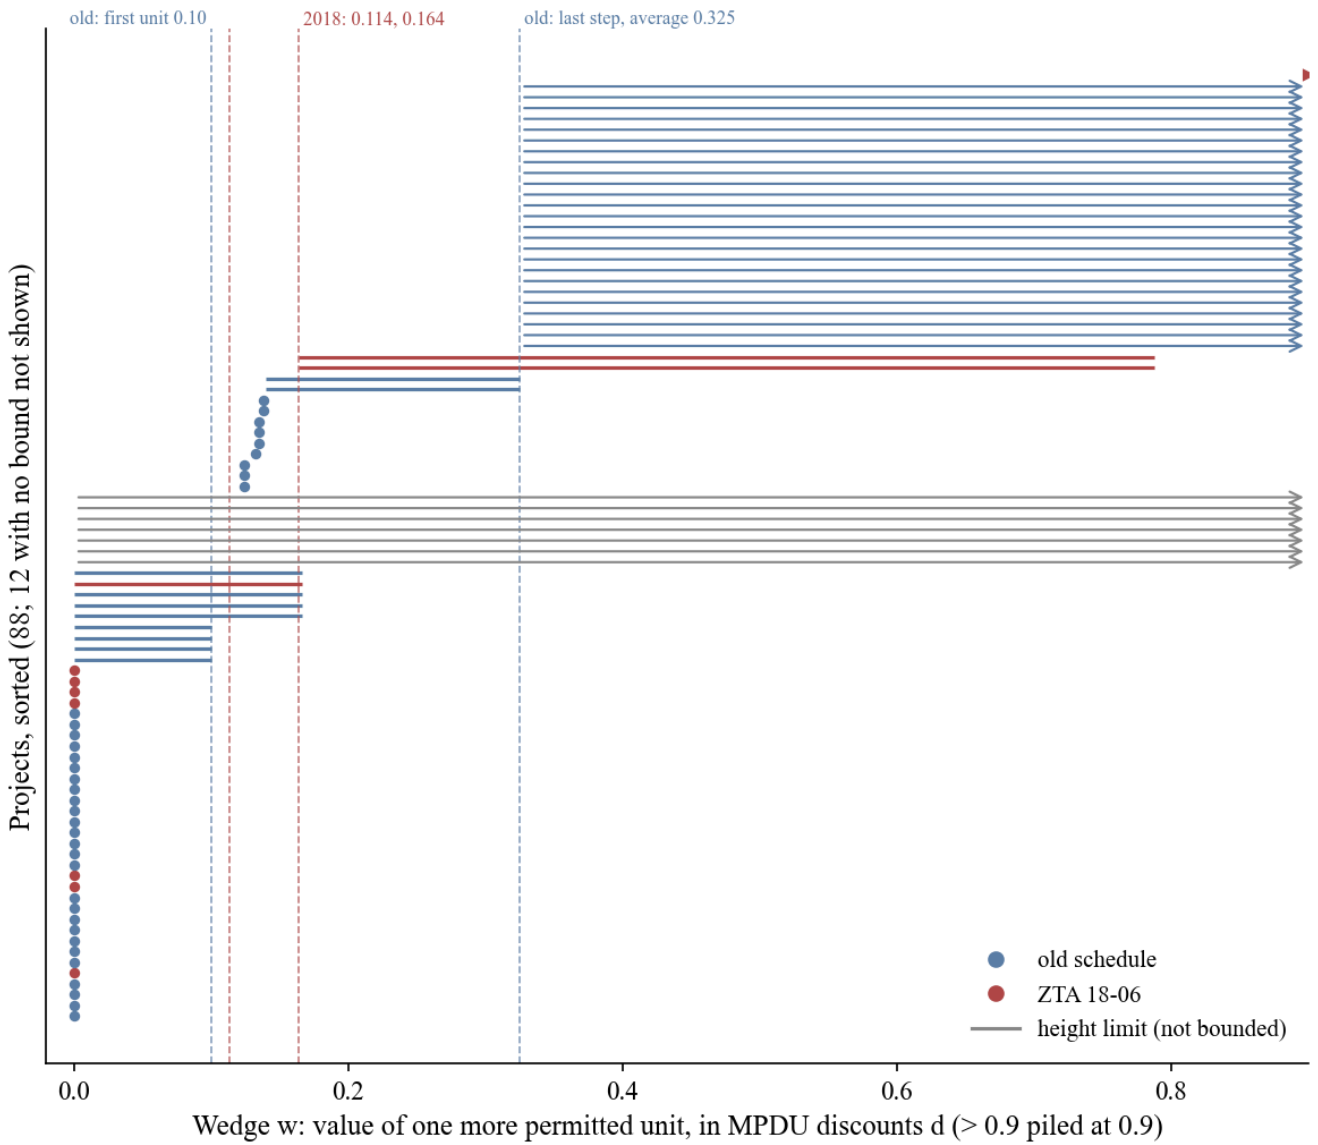

The two schedules. Top: MPDU share required. Bottom: price of one more unit in MPDUs, beyond the 12.5% it owes anyway (the old 1% steps as a line, as `10` prices them).

MPDU share and units over base, wedge sample (`09`).

Each project against the schedule it faced. Points beyond ±40% drawn at the edge.

Bound on each project's wedge (`10`), sorted; own schedule not shown.

Projects

Sorted by group, then position. Base: units allowed before any MPDU bonus. Over base: units / base − 1. Rules: old schedule or ZTA 18-06.
